Native Bee Retro Retreats

Novelty garden ornaments created with much enjoyment and serving to help raise awareness of the beneficial solitary bee and insect habitats which are being destroyed due to deforestation, urbanisation and the ongoing use of poisons.

All natural habitats

We use local sourced and hand collected materials from our Jimboomba property to fill the bee retreats.

To order please contact Louise. Your Native Bee Retreat will take approx 2 weeks to make and you can select your own tv set.

We use recycled retro televisions to build into native bee habitats!

This particular collection of retro televisions were sourced during the change over from analogue to digital tv when everyone was turfing out their old tv's in 2010. In an attempt to preserve the historical design aspects of the televisions, avoid landfill and a creative passion put the old tv units to good use, the original collector, Forbes McKail collected over 200 television sets.

One part of collection was exhibited in the Queensland Museum in 2013-14 (pictured left, top) and another in Bird Gallery (bottom). Half of the remaining collection has been donated to the For Bees Retro Retreats project.
